

I feel it is my right to access XM Radio if I do not want to hear commercials, just as it is my right not to get tele-marketing calls on my phone. It's not like we don't have the option of turning our knob over to commercial stations, but more & more commercials are stuffed down our throats until they make us sick of listening.

Broadcasters need not take our freedoms away. Do the right thing and think of the American peoples rights, and not the greedy broadcasters paycheck!
